PROFESSIONAL SUMMARY

Master's Computer Science student graduating December 2026 with a Bachelor's degree in Computer Science Engineering and hands-on experience developing software applications, AI/ML solutions, REST API integrations, and data-driven projects. Proficient in Python, JavaScript, Java, HTML, and CSS, with foundational knowledge of artificial intelligence, machine learning, natural language processing (NLP), data processing, and software testing. Experienced in developing applications from requirements through implementation, testing, debugging, and documentation. Strong analytical and problem-solving abilities with a demonstrated ability to learn new technologies quickly and apply software engineering principles to practical applications. Interested in AI-powered products, full-stack development, and production-oriented software engineering.

EDUCATION

Master of Science in Computer Science

University of Illinois Springfield, Springfield, IL | August 2025 – December 2026

Bachelor of Technology in Computer Science Engineering

GITAM University | 2021 – 2025

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, HTML, CSS, JSON, XML

Software Engineering: Object-Oriented Programming, Data Structures, Algorithms, Software Development Life Cycle, Problem Solving, Debugging, Software Testing, Requirements Analysis, Technical Documentation

Backend and APIs: REST APIs, API Integration, Data Processing, JSON Data Handling, Application Development

AI/ML and Data: Artificial Intelligence, Machine Learning, Natural Language Processing (NLP), Dataset Preparation, Data Cleaning, Data Analysis, Pandas, NumPy

Web Development: JavaScript, HTML5, CSS3, Responsive Web Development

Tools: Git, GitHub, Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Adobe Acrobat

PROFESSIONAL EXPERIENCE

AI Intern

National Small Industries Corporation Ltd. (NSIC), Hyderabad, India | May 2024 – June 2024

- Developed and tested AI/ML solutions by evaluating model outputs for accuracy, consistency, reliability, and usability.
- Prepared, cleaned, organized, and validated datasets for analysis and machine learning workflows.
- Applied data processing and analytical techniques to support AI/ML experimentation and evaluation.
- Performed structured testing and debugging to identify issues and improve the quality and reliability of model outputs.
- Analysed AI-generated results and identified opportunities to improve output consistency and application behavior.
- Collaborated with team members to translate project requirements into technical solutions and implementation tasks.
- Documented data preparation procedures, testing results, technical processes, and project outcomes for team reference.

PROJECTS

Multi-Language Translator

Python, NLP, REST APIs, Data Processing,

GitHub: <https://github.com/Divyasri2510/multi-language-translator>

- Developed a Python-based multi-language translation application using NLP concepts and third-party translation APIs.
- Integrated REST APIs to accept text input, process requests, and generate translated output across multiple languages.
- Implemented application logic for input handling, API communication, response processing, and translated text presentation.
- Processed and validated structured text data and API responses to improve application consistency and reliability.
- Tested application functionality across different inputs and translation scenarios to identify and debug issues.
- Applied software engineering principles including modular development, testing, debugging, and technical documentation.
- Used Git and GitHub for source control and project version management.

Eco-Friendly E-Lounge Platform

IoT, Application Development, App Design

GitHub: <https://github.com/Divyasri2510/Eco-Friendly-E-Lounge-Redefining-Mobile-Leisure-And-Workspaces>

- Designed and developed an application platform supporting workspace management, user interactions, and structured application workflows.

- Implemented tracking and payment-related functionality to improve application efficiency and user experience.
- Analysed functional requirements and translated user needs into application features and technical workflows.
- Organized application components and technical workflows to support maintainable development.
- Collaborated on feature planning, implementation, testing, and documentation throughout the development process.
- Tested application workflows and identified issues to improve functionality, usability, and reliability.

Portfolio Website

HTML, CSS, JavaScript, Responsive Web Development,

GitHub: <https://github.com/Divyasri2510/Simple-Portfolio-Website>

- Developed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase projects, technical skills, and contact information.
- Implemented JavaScript-based interactive functionality, including mobile navigation and contact form handling.
- Used CSS Flexbox and Grid to create responsive layouts across desktop and mobile screen sizes.
- Structured frontend components for readability, maintainability, and consistent user experience.
- Tested application functionality and responsive behaviour across different screen sizes.
- Used GitHub for source control and project version management.

LEADERSHIP AND ACTIVITIES

Committee Member — Pramana 2023 Tech Fest

GITAM University

- Collaborated with team members to coordinate technical event activities and manage assigned responsibilities.
- Communicated effectively with team members while working in a fast-paced environment.
- Demonstrated organization, task management, teamwork, and problem-solving skills.
- Supported multiple activities while working within established timelines.

ADDITIONAL STRENGTHS

- Strong analytical and problem-solving abilities
- Quick learner with ability to adapt to new technologies and engineering practices
- Hands-on experience with Python, APIs, NLP, AI/ML concepts, and data processing
- Experience developing, testing, debugging, and documenting software applications
- Experience working with technical requirements and structured datasets
- Strong written and verbal communication skills
- Comfortable working independently and collaboratively
